**Tumour Marker Test @ \$35 each (by using the same amount of blood taken)**

<b>Liver (AFP)</b> - Alpha-Fetoprotein is a protein to screen for liver cancer.	<b>Pancreas (CA19.9)</b> - This test screen for Pancreatic cancer. Pancreas produce enzymes to digest food, as well as insulin to regular blood sugar.
<b>Stomach/ Colon (CEA)</b> - Carcinoembryonic Antigen is a type of molecular protein, which can be found in many different cells in our body. A rise in CEA level indicates progression or recurrence of the cancer.	<b>Nose &amp; Throat (EBV)</b> - Epstein-Barr Virus is a common virus, which can be linked to several rare cancers; Hodgkin Lymphoma, Nasopharyngeal carcinoma etc.
<b>Prostate (PSA) – Male Only</b> - Prostate-Specific Antigen is a protein produced by cells of the prostate gland and is to screen for prostate enlargement and disorders.	<b>Germ Cell (Beta HCG)</b> - Elevation of Beta Human Chorionic Gonadotropin level indicates abnormalities in Uterus (Female) or Testicular (Male).
<b>Ovarian (CA125) – Female Only</b> - CA125 is a protein found in women. Women with Ovarian Cancer have relatively high level of CA125 in their blood stream.	<b>C-Reactive Protein (HSCRP)</b> - High Sensitive C-Reactive Protein is to measure the level of inflammation in the body. This may lead to several heart-related conditions such as; Heart Attack, Stroke, Peripheral Arterial Disease.
<b>Breast (CA15.3) – Female Only</b> - Cancer-Antigen 15.3 is used to monitor breast cancer.	<b>Stomach Ulcer (Helicobacter Pylori)</b> - Helicobacter Pylori is a bacterium in the stomach. This bacterium causes chronic inflammation which may lead to stomach ulcers & gastritis.
<b>Testosterone</b> - This is the principal male sex hormone that plays key roles such as enhanced libido, energy, immune function and protection against bone loss. Testosterone levels decline gradually with men.	

<b>Flu Vaccination</b> - also known as flu shots or flu jabs, are vaccines that protect against infection by influenza viruses.	\$30
<b>Ultrasound Carotid Scan</b> - A 5 minutes direct-visualization scan at the blood vessel (neck area) to detect any risk of stroke and any cholesterol plaque forming. (Verified by Cardiologist)	\$100
<b>Endocrine Profile</b> -Thyroid Function Test – Free Thyroxine (FT4) + Thyroid Stimulating Hormone (TSH)	\$40
<b>Blood Group Screen</b> - A blood type is a classification of blood based on the presence or absence of inherited antigenic substances on the surface of red blood cells.	\$20
<b>Hepatitis Screening (A &amp; B)</b> - Hepatitis A & B can lead to complications such as chronic Hepatitis, liver failure, liver cancer and liver cirrhosis (hardening of liver).	\$45
<b>Faecal Occult Blood Test</b> - Checks for hidden (occult) blood in the stool.	\$15
<b>Anti CCP Blood Test</b> -Anti CCP antibody testing helps to evaluate the likely development of RA in people whose RA Factor shows negative but noted to have joint pain.	\$80
<b>Vitamin D</b> - Insufficiency of Vitamin D will lead to osteoporosis.	\$120
<b>Full Blood Count</b> -tests for disorders and <b>abnormalities of the blood</b> but, as blood travels throughout the whole body, it can give an indication of disease present in other organs.	\$30
<b>Bone Study</b> (Calcium, RA Factor, Phosphate) - Screens for bone and joint disorders such as gout and rheumatoid arthritis.	\$25
<b>Urine analysis</b> - Test can detect some common diseases. It may be used to screen for and/or help diagnose conditions such as a urinary tract infection, kidney disorders, liver problems, diabetes.	\$25
<b>Pre-Marital Screening</b> Female - Rubella IG Antibody + HB Electrophoresis (Thalassemia Screen) Male - HB Electrophoresis (Thalassemia Screen)	\$85 \$55
